

1. Scientz-09

2. sample holder

### Main Technical Parameters

- Rattling Time: 0.1~99 minutes (to 0.1minutes step) or 6~5940 seconds
- Rattling speed: 180~720 stokes/min (to 0.1 times/second step)

Display the actual rattling number, the system automatically adjusts the slap speed  
Multi-Stage programming can be designed: parametric groups can be set according to one's wishes.

- Parameter storage: More than 10 groups of multi-stage programming parameters are stored
- Effective Volume: 3~400ml
- Slap Box: Stainless steel
- Supply: 220VAC/50HZ or 110VAC/60HZ
- Weight: 18.5kg
- Maximum Power: 300W
- Sterile bag: 17x30cm
- Display: Digital display
- Rattling Spacing: 0~5mm adjustable
- Soft-start mode: Gentle start
- Dimensions: 420x245x340mm
- Pause Function: To ensure sample security With auto-stop anti-trap feature  
Removable windows and adjustable slap board, toughened glass security door
