

Centurion Scientific Ltd.

K2015 Series Refrigerated Centrifuges

With its bright touchscreen LCD screen and rotor options up to 3L, K2015 series offer ideal results for research laboratories.

- Ozone-friendly CFC free cooler (*)
- Ease of operation with microtube and fixed angle rotors to reach high RPMs
- 108 Program memory
- LCD display and touch key combination
- Highest security level with multi locking system
- Speed control with high speed sensor
- Autoclavable rotor advantage

(*) For K2015R refrigerated model

It is ideal for research laboratories with the freedom to work with tubes in different types and capacities and with standard and refrigerated options.

Technical Specifications

Application Note

Speed	500- 15,000 Rpm (1 Rpm increments)
RCF (Max)	22,000 G
Timer	0-9999 min & hold (1 sec increments)
Dimensions	315 x 450 x 635mm
Weight	62 Kg (without rotor)
Power	690 Watts
Memory	108 programmes
Acceleration	10 programmes
Deceleration	10 programmes
Temperature (*)	-9°C - + 40°C (+ / - 1°C) with PID Control

(*) For K2015R model
