

The honey refractometer was specifically designed to determine the percentage of water contained in honey using the refractive index.

### Specifications

Model	HHR-2N
Cat.No.	2522
Measuring range	from 12.0 to 30.0% (water content in honey)
Minimum scale value	0.1% (water content in honey)
thermometer	Temperature compensation scale
measurements and weight	4 x 4 x 17cm, 260g
