ATAGO offers its "Palette" series digital refractometers for a wide range of applications and industries. The PR-32alpha, PR-101alpha, PR-201alpha, and PR-301alpha feature ELI (External Light Interference) technology, which provides security when performing measurements outside or near a bright window. They also display measurement temperature and allow the user to create up to three user scales, so that no conversion tables are needed.
