

JP-010S 2L

Professional Commerical Benchtop Standard Digital Ultrasonic Cleaner

The standard digital ultrasonic cleaner JP-010S 2L is an ultrasonic cleaner for professional commercial benchtops and can be used not only to clean jewelry but also to clean other small items with complex surfaces, such as shaving heads, watches pieces, etc. Based on 40kHz ultrasonic frequency and 60W ultrasonic power, it can create more cavitation, and improve penetration, but cause much less noise than other devices whose frequencies are close to 20 kHz. Great for business, commercial, or home use, this ultrasonic cleaner will have your items looking brand new again.

Application Scenario

Jewelry

Glasses

Hardware

Watchband

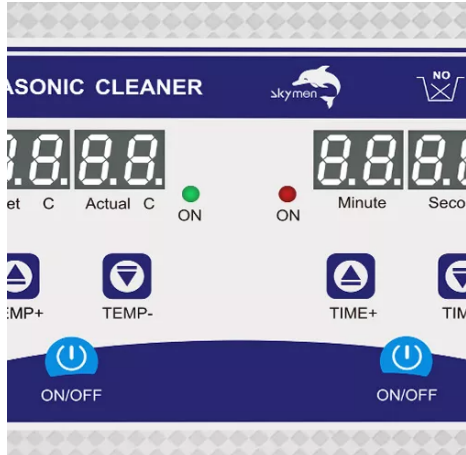

Metal Parts

Upgraded stainless steel water tank, which is sturdy and durable, corrosion-resistant and wear-resistant. The overall structure ensures no leakage.

40KHz Powerful Transducer

The transducer emits a 40KHz ultrasound. Create millions of microscopic cleansing foams to powerfully clean surfaces or crevices of parts.

Digital Timer & Heater

Time is adjustable from 0 to 30 mins, and temperature can be set within 0-80°C/176°F, displayed on LED screens. The heating function dramatically improves cleaning efficiency. Ultrasonic cleaning and heating can work at the same time.

Power Cleaning

The machine possesses an ultrasonic cleaning frequency 40kHz, the most stable frequency, with an ultrasonic power of 60W and heating power 100W. The scientific parameter design of frequency and power can effectively make your valuables and items clean as ever without any damage.

Well Layer

Stainless steel lid with a handle prevents water from radiating heat. Non-slip rubber foot pads increase the stability of the sonic jewelry cleaning machine. The mental protective coating ensures the long service of life.

2L Tank Capacity

The professional ultrasonic cleaner features a sizeable 2L/0.53 gal tank, coming with a cleaning basket to reduce friction during washing. The integrated cleaning basket is perfect for keeping your jewelry, glasses, PC boards, razors, carburetor, and watches in place.

Product Parameters	
Model Number	JP-010S
Cover Color	Blue
Color	Silver
Function	Ultrasonic cleaning/ Timer/ Heating
Tank Capacity	2L/ 0.53gal
Ultrasonic Frequency	40kHz
Heating Setting	0-80°C/ 176°F
Timer Setting	0-30 mins
Ultrasonic power	60W
Heating Power	100W
Unit Size	175*160*210mm/ 6.9*6.3*8.3 in
Tank Size	150*135*100mm/ 5.9*5.3*3.9 in
Carton size	255*240*265mm/ 10*9.4*10.4 in
N.W./G.W	2.22kg/ 2.62kg
Power Supply	AC 100-120V 60Hz/ AC 200-240V 50Hz
Material	Stainless steel SUS304
